

Scale-X™ Dithiazine Remover

Scale-X™ is a non-toxic, non-hazardous acidic cleaner and descaler.

Application

Over time, amorphous dithiazine—an insoluble solid produced when certain amine-based hydrogen sulfide (H₂S) scavengers react with hydrogen sulfide (H₂S)—collects inside valves and instrumentation, reducing flow. Scale-X™ is specially formulated to dissolve this buildup and optimize flow performance.

Directions for Use

Wear appropriate personal protective equipment (PPE) during use. Directly spray onto affected parts until soaked. After allowing an appropriate amount of time, wipe the treated surface. No rinsing required.

Physical Properties

Scale-X™ Dithiazine Remover

Physical State	Liquid
Color	Green
pH	2.5–3.5
Percent Volatile	70–75%
Flash Point	None to Boiling
Boiling Point	210 °F to 220 °F
Solubility in Water	Soluble
Specific Gravity	1.17 to 1.18

Handling

Do not get in eyes or on skin or clothing.

Refer to the Safety Data Sheet for further handling information.

Packaging

32-oz Spray Bottle

Features

- ✗ Non-VOC
- ✗ Non-Toxic
- ✗ Non-Hazardous
- ✗ Safe
- ✗ Water Soluble
